

CLEAN, DEODORIZE & DISINFECT WITHOUT TOXIC CHEMICALS

Force of Nature is a small appliance that converts salt, water and vinegar into an a cleaner, deodorizer & disinfectant as effective as bleach. It has no toxic chemicals.

Add 1 capsule of salt, water and vinegar to tap water and push the start button. In about 6 minutes, Force of Nature™ uses electricity to change the chemical composition of the solution into 2 gentle but powerful ingredients:

1. Hypochlorous acid, a disinfectant that kills 99.9% of germs
2. Sodium hydroxide, a common detergent

HOW IT WORKS

Force of Nature miniaturizes an industrial technology called “electrolyzed water” that’s so gentle & effective it’s used for sanitizing hospitals and in wound & eye products. When Force of Nature sends an electrical charge through salt, water, and vinegar, the chloride molecules are attracted to the positive side of the charge where they bond with oxygen and hydrogen molecules and are electrochemically converted to hypochlorous acid (HOCl). The sodium molecules are attracted to the negative side of the charge where they bind with oxygen and hydrogen molecules and are electrochemically converted to sodium hydroxide (NaOH). The result is one powerful multi-tasking cleaner that is an EPA registered disinfectant as effective as bleach and a cleaner & deodorizer as effective as the top brands.

BENEFITS

Kills 99.9% of germs, including Salmonella, Staph, MRSA, Norovirus, Influenza A, Listeria and Pseudomonas. EPA registration #93040-1. Designated by the EPA for use in schools, daycares, hospitals, medical & veterinary facilities, restaurants.

Zero toxic ingredients. No allergy or asthma triggers. No gloves or rinsing needed, even on baby gear & toys

Cleans virtually any surface. As effective as Formula 409 on grease, Scrubbing Bubbles on soap scum, Windex on glass, Resolve on rugs, Febreze on odors. **Streamlines multiple cleaners** to one

Saves money. Costs just \$.07 per ounce, a savings of up to 80% per oz vs typical natural cleaners

Eliminates tough odors – trash cans, sports equipment, cat litter, pet accidents, shoes

Eco-friendly: zero toxic chemicals going in to the water system, no plastic bottles to be disposed of, shipping & Capsule packaging 100% recyclable
